ALURI ARUN PRAKASH

Software Engineer | Front End Developer

📞 7702291840   @ arun.prakash421@gmail.com   📍 Chennai

SUMMARY

As a Software Engineer at Sundaram Finance Limited, I specialize in full-stack development with expertise in React.js, Node, Express.js, Spring, Redux, and SQL. I have been contributing to the company's innovative projects since July 2023, focusing on Spring Boot and React.js development.

Before joining Sundaram Finance, I completed a dynamic 6-month on-the-job training program at Sundaram Infotech Solutions, where I received comprehensive training from Manipal Academy and acquired hands-on experience in various full-stack technologies. I collaborated on real-world projects and delivered solutions that met the client's requirements and expectations.

I graduated from Lakireddy Bali Reddy College of Engineering with a Bachelor's degree in Electrical, Electronics and Communications Engineering in June 2019. I am passionate about #ReactJS, #Frontend, and #WebDevelopment, and I am always eager to learn new skills and technologies. I value teamwork, innovation, and quality, and I strive to create user-friendly and responsive web applications that solve real-world problems. Let's connect and explore opportunities to collaborate and innovate.

PROJECTS

DEMS_ Department and Employee Management System

📅 Date period 📍 Location

DEMS (Department and Employee Management System) is a comprehensive full-stack application designed to streamline organizational workflows. This project, available at [https://github.com/ArunAluri402/DEMS_Fullstack]. Developed using React js, Spring and MySql. DEMS enables easy tracking of employee information, departmental interactions, and provides seamless communication within the organization.

- What was a successful outcome of your work? (e.g. Raised $3,000 for the charity)

UBER_Clone_Application

📅 Date period 📍 Location

Uber which was very famous booking application, here I have tried to clone the application with help of tutorials of https://www.youtube.com/@CleverProgrammer, where i have covered the Next js, React js, FireBase and MapBox gl for maps and tracking.

for code please check out the link which will take you to my github.
